## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136 (a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 3711

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 7, 12 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Lo. In response to applicant's arguments Lo discloses the claimed structure and will inherently perform the same function. Lo's portion 20 equates to applicant's portion 16. In both cases the bore starts beyond the ferrule.

Claims 5 is rejected under 35 U.S.C. 102(b) as being clearly anticipated by Barrows. In response to applicant's arguments Lo discloses the claimed structure and will inherently perform the same function.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 2-4, 8, 10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lo. Lo discloses the claimed device with the exception of the wall thickness. However, absent some showing of unexpected results, the exact thickness of Lo's wall would obviously have been up to

Art Unit: 3711

the ordinarily skilled artisan depending on the strength and weight characteristics desired by the player.

In response to applicant's arguments, just as in applicant's device the thickness of Lo's wall must be selected to be of appropriate strength to compensate for the fact that the tip end of the cue is hollow.

Claims 6, 9, and 11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ghezzi et al. (Ghezzi). Ghezzi does not disclose the exact length of his bore though it appears to be on the order of 4 to 5 inches. The exact length would obviously have been up to the ordinarily skilled artisan depending on the amount of length that one felt was necessary to properly retain the tip element. Just as in applicant's claimed device the removal of material from the tip end will lighten that portion of the cue.

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-12 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-9 of U.S. Patent No. 6,110,051. Although the

Art Unit: 3711

conflicting claims are not identical, they are not patentably distinct from each other because removal of the additionally claimed elements with their corresponding loss of function would have been obvious to one of ordinary skill in the art.

Steffes has been cited for interest because it discloses a similar cue.
